

Types Of Adaptations

We have been talking about this word “*Adaptation*” a lot, now let's get examples of them.

Animals have numerous adaptations they have developed over time; here's a short list of physical and behavioral adaptations as examples.

<u>Physical</u>	<u>Behavioral</u>
<ul style="list-style-type: none">- Claws- Venom- Shells- Color- Fur	<ul style="list-style-type: none">- Hibernation- Mimicry- Playing dead- Cleaning itself

Now it's your turn to think of some adaptations, both physical and behavioral, to add to the list!

List at least five of each.

Remember, these can be found in any organism! If you need inspiration, just think about your top 3 favorite animals to see at the zoo.

<u>Physical</u>	<u>Behavioral</u>

Great job! Now that we have a list of adaptations, we're going to use it for our next activities!
